

PRACTICAL RESOURCES FOR EFFECTIVE SHEPHERDING AND SPIRITUAL CARE

*Connecting Care to The Local Church*

OCTOBER 27-28, 2022 ST. STEPHENS BAPTIST CHURCH, TEMPLE HILLS, MD

## Lay Leaders' Convocation

Friday, October 28 1:00 PM

**Facilitator: Rev. Dr. Thuam Khai**

For church leaders, spiritual intelligence derives from a performance of understanding, support, and targeting the innate strengths of the congregation. Whereas an emotionally intelligent manager is able to derive high performance through empathy and awareness of needs, the spiritually intelligent church leader is able to derive performance through the premise that each individual has talents that can manifest themselves through nurturing and mentoring. Alike, emotional and spiritual intelligence can result in higher participation by targeting the latent potential of congregants.

The Healthy Administration Model is Spiritual Intelligence; from self-awareness, universal awareness, self-mastery, and spiritual presence. Spiritual Intelligence investigates the relationship of the variables such as sex, age, education, ethnic, religion, and length of service. Discover self-awareness of life purpose, mission, and vision through the complexity of thought, servanthood, and decision making.
